

# Safety and Comfort with Zero Trauma

*"Very comfortable and easy to work with. If you are working all day with harness on I would recommend this piece of kit".*

Matt Broughton: Chubb Electronic Security Systems

## ZT ... the NEW standard in Safety Harnesses

ZT Dual Harness

AS/NZS 1891.1:2007 Certification, industrial fall-arrest systems and devices

ZT Universal Harness

AS/NZS 1891.1:2007 Certification, industrial fall-arrest systems and devices

**Still sounds too good to be true?**

See the video of the ZT safety harnesses in action at: [www.ztsafetysystems.com](http://www.ztsafetysystems.com)

# It's enough to make your eyes water ...

If you fall from height whilst wearing a conventional safety harness, 100% of the falling force will be directed to your groin area.

But the ZT Safety Harness range features a revolutionary design which eliminates groin straps, distributing the force of the fall to the whole body, leaving you at far less risk of discomfort, or worse!

**ZT = Zero Trauma.**

ZT's designers have set out to create a fall arrest, or fall restraint harness, that is part of your workwear - so it's not only easy to use but also comfortable to wear,

No-one should change their safety regime without good reason, so here are 10 good reasons to choose ZT Safety Harness:

1. Less risk of injury - no pressure point load to sensitive places
2. Greatly reduced risk of whiplash compared to conventional harnesses
3. No D-rings, so you can even wear it while driving
4. Suits a bigger operator - certified safe to 150 Kg
5. Easy to wear correctly - designed into your trousers or coveralls, so it can't be put on back-to-front
6. Flexible to work with - as it's part of the workwear
7. No need to tighten it again once it's on
8. No loose straps or lanyards, so nothing to catch on obstacles
9. Eliminates 'suspension trauma' - organ and tissue damage caused by being left dangling after a fall - because the ZT pulls your legs up into a safer, seated position
10. Safety management: Operators don't have to be encouraged to wear the ZT as it's already part of their everyday workwear
